

# Mixed Container Planting Services

*This service is available in-store only and an appointment is recommended.*

This is a service we provide to customers needing a mixture of plants potted into a container together and is available year-round for customers who have chosen the plants themselves or with our help on the sales floor. Appointments are recommended if you would like assistance selecting from our current inventory. Appointment requests can be sent to [gardeninfo@plantkingdom.net](mailto:gardeninfo@plantkingdom.net).

Once the plant material has been selected, a more exact estimate can be given on how much it will cost for us to plant, but the minimum cost to plant is \$75. Payment for this service, including plants, materials, and labor will be due upon pickup. The average turnaround time for this service is 3-5 days (excluding weekends), but between April 15<sup>th</sup> and May 31<sup>st</sup>, this time is extended to 6-10 days (excluding weekends). Once the planting is complete you will receive a call and are required to pick it up within 2 days. If you choose to or need to have the container(s) delivered, there will be an additional fee.

If you need more assistance selecting plants than we can offer on the sales floor or would like us to design it completely you must go through our traditional consulting service. Labor fees for this service are determined individually by the project and an estimate will be given as a part of our traditional consulting service.
